Aiding teaching

Technological innovations offer solutions to better education

The School of Leadership Excellence (SLE) conducted a seminar on Technological Innovations in Schools at Jain College, JC Road. Principals, trustees and founders attended the event that was held recently. The seminar focused on various creative solutions that information technology provides for education and emerging trends in technology. Renowned speakers from the fields of IT and education addressed the gathering.

Yeshaswini Ramaswamy, anchor, School of Leadership Excellence, said, "SLE is an institute that

will offer leaders an exciting platform to discuss their experiences. Its prime objective will be to promote innovation in sectors that are vital to help India be-

come a leading world economy." SLE also introduced Edu.IN (Innovations in education) a non-profit entity for creating favourable paths to achieve that goal through seminars and workshops. The first session of the seminar covered topics like news and emerging technologies for the emerging sectors. The second session focused on case studies of companies like NIIT which have successfully implemented technology in schools. Speaking on the occasion Meena Ganesh, CEO, Manipal K-12 education, said "IT offers students both in schools and colleges and teachers/professors a rich collection of new interesting animations, facts, diagrams and more. The interactive dimension of IT will immensely aid in achieving the objectives of a subject and will also make learning a truly, engaging, enjoyable and illuminating process."
