

UNIQUE M TECH MODULES

India's top-ranked deemed-to-be university, Jain University, in collaboration with Indian Green Building Council (IGBC), announced the launch of a unique 2 year M Tech programme in Building Science and Technology (with specialisation in Green Technology). This four semester programme with an intake of 18 seats will commence in 2014.

The modules covered are environmental and sustainable engineering, green technology, carbon footprint and measurement for all building types, modern materials, construction and characterisation, besides others. The pedagogy and the curriculum have been designed, keeping in view the

professional demand for cutting edge technology solutions to address the sustainability challenges.

Speaking on the launch of the M Tech programme, Dr N Sundararajan, vice chancellor, Jain University said: "The rapid urbanisation leading to environmental degradation on a massive scale is mainly attributed to the building and the construction industry. Sustainable building technology requires interdisciplinary expertise and today there is a dearth of professionals in the space, with specialised knowledge and skills. Hence we have joined hands with IGBC for the programme with a green technology edge."
