Science Model Expo V at Jain University

Jain University — School of Graduate Studies organised Science Model Expo V, an opportunity for budding scientists to explore the mysteries of science. The science model expo is an intercollegiate event conducted to showcase the scientific temper of students through live models. This event is an attempt to inculcate the spirit of innovation and creativity in the young minds so that, they are able to contribute to the ever-growing field of science. It manifests the enthusiasm and interests of students in exploring new technology and innovation that can help India achieve the status of formidable scientific power. The event was inaugurated by Prof MS Hegde, dean, Solid State and Structural Chemistry Unit IISC, Bangalore. He gave a brief talk on significance of fundamental research and need to promote basic sciences ■
