Students come up with unique innovations

Arun Dev. BANGALORE

Young brains in the city seem to have got their act together to ensure that India's scientific exploits become the major talking points in the coming years.

The science exhibition that is being held in the city's Jain College is manifesting the enthusiasm and interest of the students in exploring new technology and innovations that can help India

achieve the status of a formidable scientific power. The inter-collegiate science fest was inaugurated by principal of the Jain College, VT Venkatesh, on Monday.

The exhibition saw enthusiastic visitors, especially school students, who were also there to observe the wonders of science. The event witnessed huge participation from colleges like Krupanidhi College, Maharani's science college, Vijaya College etc. Around 400 models were exhibited. Turning head, mouse trap car, Vandergraaf generator; adverse affects of smoking on lungs, biogas production, fermenter, applied trigonometry, topological bodies, robotics and brachisrome model were some of the major attractions of the event.

Suddakar Reddy of the physics department of Jain College said, "We were looking at innovations and new ideas that the students can come up with."
