

**Two-day course on Aero Engine Technologies organized by  
International Institute for Aerospace Engineering and Management (IIAEM),  
Jain University**

International Institute for Aerospace Engineering and Management (IIAEM) is a collaborative venture between Jain University and Society of Indian Aerospace Technologies and Industries (SIATI), and leading Aerospace organizations.

The two-day course on Aero Engine Technologies will be held on 11 & 12 November 2014, at Aeronautical Society of India, Suranjandas Road & Old Madras Road Junction (Opp. HAL Engine Division & near Byappanhalli Metro Station), Bangalore- 560075 during the timings 9 am to 5 pm.

The objective of the two-day course is to expose the current trends in the Aero-Gas Turbine Propulsion, and the state of the art and emerging technologies in Civil & Military Aero Engines.

A number of speakers, from various walks like academicians, research and development organizations and industry experts, who have varied experience in the field, will be sharing their knowledge. The course will be packed with information on the manufacturing and structural aspects of aero engines, and design, development and testing of aircraft engines.

Scientists and engineers associated with design, development and testing of aircraft and helicopter engines. Faculty and students in the field of aeronautical, aerospace and aircraft maintenance engineering can be benefited by this course
